- We'll address the questions at the end
- We'll reply to all unanswered questions via email

Presenters

- Joni Klippert
Director of Customer Development
- Jason Hand
Director of Technical Support

About Us

- Building cloud-based application management solutions since 2009
- Based in Boulder, CO
- Investors include Foundry Group & Avalon Ventures

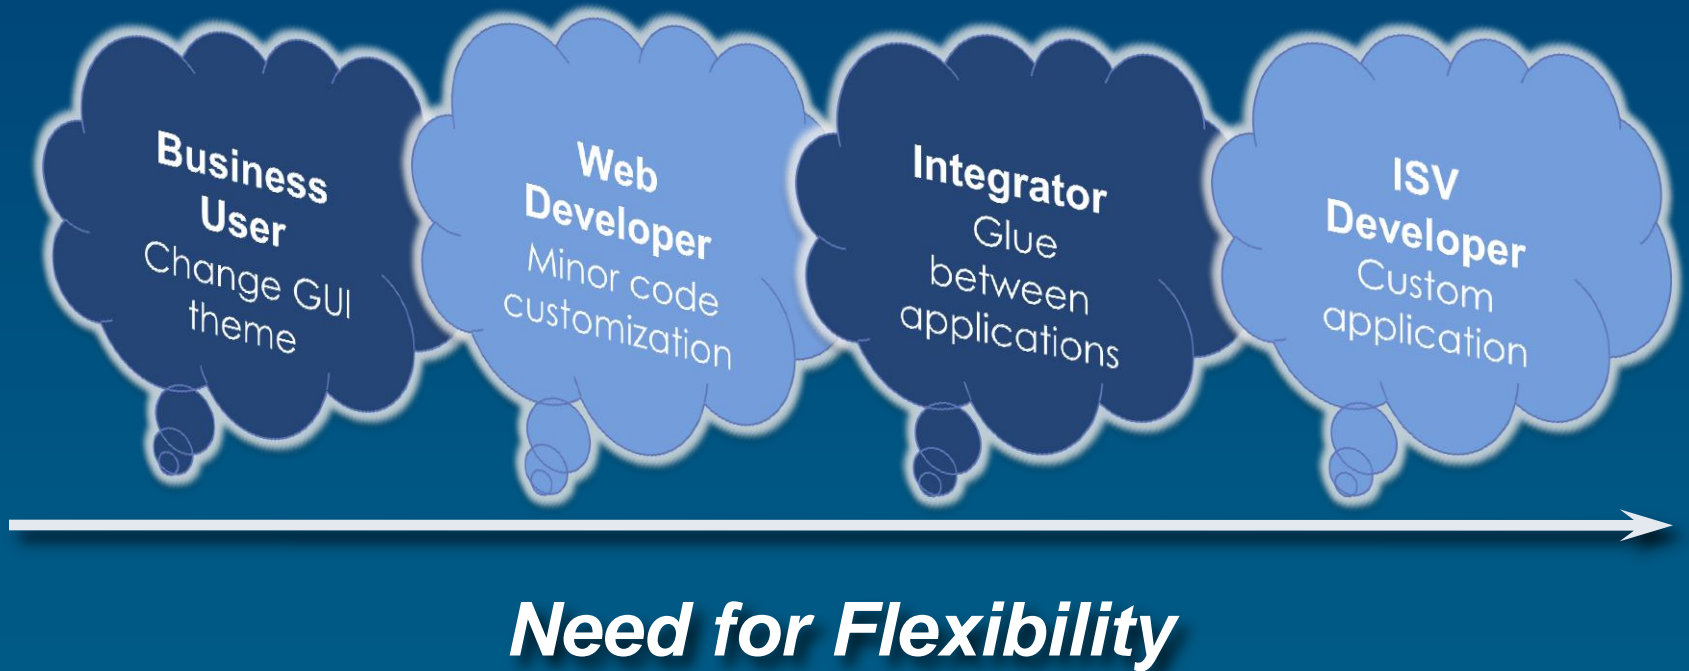

Our Commitment

An Application Management Layer for Application Developers and Business Users

Easily install, manage and scale applications
on any cloud infrastructure

Application users have a continuum of flexibility needs

Standing Cloud is an *application layer* service.

Application Layer

Infrastructure Layer

You can deploy and manage more than 100 applications and languages with a few clicks ...

Application Users

Developers

Custom

{ Your Application Here }

... on your choice of a variety of IaaS cloud services.

Standing Cloud Deployment Model

- Standing Cloud connects directly via API to 15 leading cloud providers
- Virtually provisions servers
- Scripts deployment of 100+ application and language stacks
 - Scripted deployments are portable & scalable
- OS independent

Deploying Drupal on Standing Cloud

- Pick your cloud
- Select your application and/or technology stack
- Spin up the environments you need, as many as you need
 - Pay only for what you use
- Use git or SVN to port an existing site or start fresh
